PROFILE

Business Management graduate and MSc Project Management student with experience supporting **15+ construction and maintenance projects**. I coordinate 2–5 live workstreams, coordinate 20+ suppliers and track milestones, materials and costs through handover. Clear Excel logs, early variance flags and concise progress summaries give the business owner visibility to act. I'm ready to bring practical delivery experience, clear communication and a careful eye on cost, risk and follow-up to a UK graduate project team.
