MSc Project Management · Project Support & Controls · Trilingual (English, French, Arabic)

Liverpool, UK (open to relocating) · +44 7771 071562 · achrafdaou69@gmail.com · LinkedIn · Portfolio · Right to work in the UK

PROFESSIONAL SUMMARY

An MSc Project Management student with five years already spent supporting live construction projects, covering scheduling, cost tracking, procurement and site records across more than fifteen jobs. Comfortable with Excel, PRINCE2 and data analytics, and recently spent time shadowing a project manager on a major rail programme to see how large infrastructure is controlled day to day. Early in my career, quick to learn, and motivated to build a strong record in project delivery or project controls.

SKILLS

Project controls: cost tracking and budgeting, scheduling, progress and milestone monitoring, risk and change control, procurement and supplier coordination, project documentation, PRINCE2 method.

Tools and data: Microsoft Excel (formulas, pivot tables, lookups), Microsoft Project, Power BI, data analysis, KPIs and dashboards, Microsoft Office, AI tools for reporting.

Business: operations management, business analysis, budgeting and forecasting, cost and variance analysis, process improvement.

Strengths: attention to detail, organisation, meeting deadlines, stakeholder and supplier communication, problem solving, working under pressure.

Languages: English, French and Arabic (all fluent).

WORK EXPERIENCE

Operations Management and Project Support

M2C Maroc, Kénitra, Morocco · April 2020 to Present

- Coordinate **planning and scheduling across 15 or more construction and maintenance projects**, typically MAD 100,000 to 500,000 (about £8,000 to £40,000), tracking progress against milestones from initiation to handover.
- Track **cost and material spend against budget** on 2 to 5 concurrent projects, flagging variances early so decisions are made on current figures rather than estimates.
- Manage a **supplier base of over 20**, coordinating orders and resolving supply issues before they affect the programme.
- Build and maintain **cost logs, project records and site documentation in Excel**, consolidating supplier and site data into regular progress and cost summaries for the business owner.
- Introduced **AI and digital tools** into routine reporting and document work, cutting time spent on administration.

Job Shadowing, Construction Project Manager

ONCF (Office National des Chemins de Fer), Rabat, Morocco · Summer 2025

- Arranged a **volunteer placement** to shadow a project manager on ONCF's rail programme in Rabat, linked to the planned 3.3 km tunnel under the Bou Regreg river between Rabat Agdal and Salé.
- Followed the project manager through full working weeks: site walks, progress meetings with contractors and the engineer, and the reporting that followed.
- Learned how a large public infrastructure job is controlled day to day, how the master programme is broken into activities, and how site instructions, requests for information and design queries are logged and chased between client, designer and contractor.

President, Moroccan Global Society

University of Huddersfield Students' Union, UK · September 2023 to June 2025

- Led a committee delivering a full programme of events for **over 100 members**, planning schedules, allocating tasks and tracking delivery to deadline.
- Managed the **society budget**, monitored spend against allocation and reported activity to the Students' Union.
- Won **Best Global Society** and the **Social Media Award**, competing against larger and longer-established societies.

Student Course Representative

University of Huddersfield ISC, UK · September 2021 to June 2022

- Chosen to **represent 40 students**, gathering feedback, raising issues with tutors and course leaders, and following each one through to resolution.

Administrative Assistant

STE Wild Five Nine SARL, Morocco · February 2019 to August 2019

- Maintained invoices, delivery documentation and client records, checking figures and details for accuracy before filing.
- Used **Microsoft Excel and Office daily** to log operational data, track deliveries and produce records for the manager.
